SMP Parallel Pugs on GHC

Audrey Tang announced that parallel support, on top of the Glasgow Haskell Compiler's new SMP runtime system, has been added to Pugs, the standard bearer Perl6 implementation.

MissingH 0.16.0

John Goerzen announced that the latest version of MissingH is now available. MissingH is a suite of 'missing' library functions. New features include: render numbers as binary units, a progress tracker, turn QuickCheck tests into HUnit tests, and GHC 6.6 support.

Yet Another Haskell Tutorial

YAHT is now a part of the wikibook. Eric Kow announced that the famous 'Yet Another Haskell Tutorial' has been imported into the Haskell wikibook. Let the great Haskell Remix begin!
