- Student comments regarding Assistants:
Following and reading an assistants explanation can be difficult.

➔ Ana has already mentioned similiar comments to the assistants and will do so again.

- Student comments regarding Assignments:
Not being able to touch up your assignment after recieving feedback lies in focus.

Proposed that Assignments instead are turned in at the end of the course, in case if you learned a specific weeks material after it was originally examined.

➔ Ana has noted the comments, but can probably not change much due to resourcelimits.

- General comment from both sides:

Students should use the resources at hand more, e.g go to consultation time, ask during class etc.

- Students comment regarding Kahoots:

Kahoots works well, a potential requested change is that the quiz should be put at the end of a lesson as part of a "recap".

➔ Ana comments that the general idea at the moment is that Kahoots should be used at the start of every lesson as part of a recap to check your knowledge regarding the topic during the previous lesson, this is to let students get used too and work a bit with the material.
