

# Domain Model Seminar 3/4

The seminar will be quiz-based. This is the process

1. Group will present group number (only, ... not project name or similar) and member names.
2. The group will show a slide of the domain model as an UML-class diagram (or central parts of). If the class diagram has a class named as the domain (or application) this should be replaced with a "?", compare Analysis-slides from lectures. This should apply to only one class. Use standard UML notation!
3. The group should let the audience try to figure out what domain the class diagram is modeling. If needed give some hints, and possibly more hints, ... until someone has the right answer. If no answer in max 5 min. you have to tell (if so must review the model, talk to supervisor)
4. After answer delivered group should present the project (name and idea, max 2 min.)

Schedule (you should attend 1 session ~ 1h)

Time	ML1	ES52	ES53
08.30-08.40	1	2	3
08.40-08.50	4	5	6
08.50-09.00	7	8	9
09.00-09.10	10	11	12
09.10-09.20	13	14	15
09.20-09.30	16	17	18
10.00-10.10	19	20	21
10.10-10.20	22	24	25
10.20-10.30	26	27	28
10.30-10.40	29	30	31
10.40-10.50	32		
10.50-11.00
