

AR for Radio / Baseband nodes

Use AR technology to support deployment of Radio Base Station (RBS) as Streetmacro (SM) nodes.

“Benchmarking” of different AR platforms (ARCore and ARKit)

Build an AR platform on iOS and Android operation system (OS) that can be used for future AR application

Case: Radio nearby
Radio Signal/ Loops
Simulation in urban
environment.

Skills:

- Unity
- ARCore/ARKit
- C#
- iOS and Android development
