

MAKING CYBERCOM

Based on Cybercom's values and inclusive culture, we are developing skills, client offerings and employees.

This is how we are making Cybercom.

Cybercom Innovation Zone

KPI visualizer

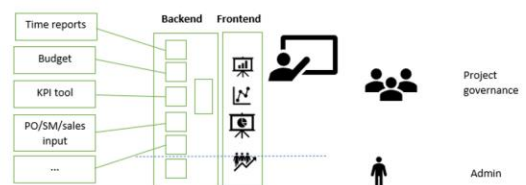

Background – The purpose is to address the need for a visualized project status. The status could/shall be based on budget, hours spent, team feeling, scrum master/PO overall judgement. This data can be obtained from multiple sources, like time reporting systems, budget system, written feedback from sales/PO/SM, Cybercom KPI tool be visualized to form a weekly/monthly review base for management.

When a project is started it shall be easy to add a new project to monitor to the "frontend".

Data to be updated frequency: TBD

Solution/Tasks

- Define the requirements/expectations
- Inventory of data sources and data types
- Frontend proposal
- Design architecture and potential solution
- Develop the solution
- Test on 1 project
- Scope needs to be set depending on number of students etc.
