

AR for Radio / Baseband nodes

Use AR technology to support deployment of Radio Base Station (RBS) as Streetmacro (SM) nodes.

“Benchmarking” of different AR platforms (ARCore and ARKit)

Build an AR platform on iOS and Android operation system (OS) that can be used for future AR application

Case: RBS Deployments

Site inspection when deploying RBS nodes and Geographical positioning on a virtual surface.

Skills:

- Unity
- ARCore/ARKit
- C#
- iOS and Android development
