4th Exercise sheet C++ Course

Boris Koldehofe

15th January 2001

Write a template class for a dynamic doubly linked list. Provide the possibility to

- insert/append elements
- traverse the list
- output the ith element of the list
- operators for copying and assigning
- the object must be safe

Demonstrate the capability of your class by writing a program for a list of integers and a list of char. The *deadline* is the 31/01/2001.
