

Plan-driven development

The one true way to go for large projects!

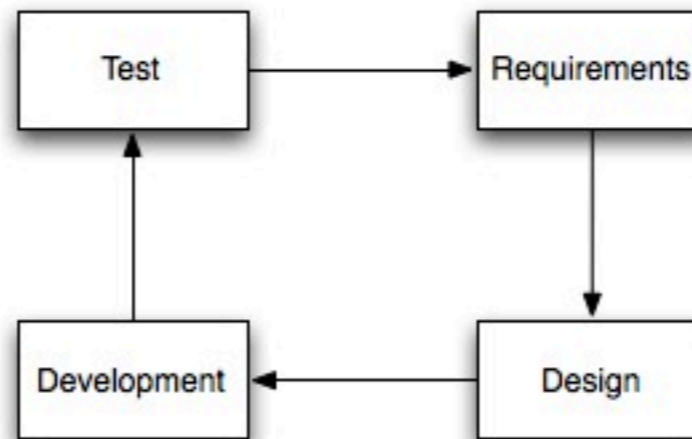

Whats wrong with Agile

- Agile-teams have size limits and will need multiple-teams.
- Communcation overhead.
- Loses alot of its main feature.
- Groups lose autonomy.
- Starts to resemble plan-driven development.
- Refactoring costs **EXTREMELY** high!

PDD

Agile

What Agile Becomes in Big Projects

(like PDD only less controlled and unintended)
